

Pumpkin Bird Feeder

Materials:

- Small to medium sized pumpkin, up to 10 pounds
- Small sticks
- Twine or rope
- Birdseed

Steps:

1. Cut the pumpkin in half.
2. Scoop out the seeds, leaving a hollow inside with 1/2-inch thick shell wall.
3. Insert two sticks across the open pumpkin to create perches for the birds.
4. Knot two lengths of rope together at the center and tack the knot to the bottom of the pumpkin feeder. Hang the other ends of the rope in your chosen feeder location.
5. Fill with birdseed.
